

Arjun Shetty

Senior Site Reliability Engineer

Bengaluru, Karnataka (Indiranagar) | +91 98862 30417 | arjun.shetty.sre@gmail.com | linkedin.com/in/arjunshetty-sre

SUMMARY

SRE with 6 years keeping large Kubernetes platforms healthy, currently at an OTT streaming platform with cricket-night traffic spikes. I run incident command, define SLOs people actually use, and automate toil away in Go. Comfortable being paged and even more comfortable making sure we get paged less. Notice period: 60 days.

SKILLS

Platform: Kubernetes (EKS + bare-metal), AWS, Terraform, Helm, ArgoCD, Vault

Observability: Prometheus, Grafana, Loki, OpenTelemetry, PagerDuty

Code: Go, Python, Bash

Practice: SLOs/error budgets, incident command, chaos engineering, capacity planning

EXPERIENCE

Senior Site Reliability Engineer — PlayVista Streaming, Bengaluru

Apr 2022 – present

- Run reliability for a streaming platform on 40+ EKS clusters, 3,000 nodes at IPL peak; 99.97% availability across the 2025 season.
- Introduced SLOs and error budgets to 30 product teams; deploy freezes now data-driven instead of political.
- Wrote a Go operator automating certificate and secret rotation, removing the platform's #1 toil item (approx. 20 hrs/week org-wide).
- Incident commander for Sev1s; cut mean time to mitigate from 74 to 28 minutes by restructuring on-call and runbooks.

DevOps Engineer — Nimbus9 Consulting, Bengaluru

Jan 2020 – Mar 2022

- Built Terraform-based AWS landing zones for 8 clients; migrated 3 clients from VM fleets to Kubernetes.
- Set up Prometheus/Grafana monitoring stacks with alerting runbooks as standard delivery.

Linux System Administrator — ServeStack Hosting, Mumbai

Aug 2018 – Dec 2019

- Managed 400+ Linux servers for a hosting provider; automated patching with Ansible.

EDUCATION

B.E. Information Science & Engineering — RV College of Engineering (VTU), Bengaluru, 2014 – 2018

CERTIFICATIONS

CKA (2023), CKS (2024), AWS SysOps Administrator (2022)
