SUMMARY

Qualified actuary (Fellow, Institute of Actuaries of India) with 8 years in capital and risk modeling at a large private life insurer. Deep experience in stochastic scenario generation, model validation cycles and regulator interaction (IRDAI). Looking to transfer risk-modeling expertise to banking market risk. Notice period: 90 days.

SKILLS

Modeling: Economic capital and risk-based capital modeling, economic scenario generators, stochastic simulation, calibration, model backtesting, stress testing

Code: R (production models), Python (2 years, growing), SQL, Git

Governance: Model documentation, IRDAI submissions, appointed-actuary support, peer review

EXPERIENCE

Senior Actuary, Capital Modeling — Sanchay Life Insurance, Mumbai

Jan 2021 – present

- Own the market-risk module of the internal economic-capital model (interest-rate, equity, spread risk) covering a Rs. 1.9 lakh crore balance sheet.
- Rebuilt the interest-rate scenario generator (Hull-White calibration to G-Sec and OIS curves) and defended it through model validation and an IRDAI review.
- Run the annual model-change process: 30+ documented changes, zero regulatory findings in 3 years.
- Mentor two student actuaries; teach the internal "stochastic methods" course.

Actuarial Analyst — Sanchay Life Insurance, Mumbai

Sep 2018 – Dec 2020

- Built stochastic mortality and lapse models; automated the quarterly solvency calculation in R.

EDUCATION

Fellow of the Institute of Actuaries of India (FIAI) — IAI, qualified 2022

B.Sc. (Hons.) Statistics — Sri Venkateswara College, University of Delhi, 2013 – 2016

LANGUAGES KNOWN

Hindi (native), English (fluent), Marathi (working)
