SUMMARY

Engineering manager with 16 years in banking technology: 8 as an engineer, 6 leading teams, currently responsible for three teams (24 engineers) modernizing a retail core-banking estate. I run migrations the boring way: coexistence layers, reconciliation first, no big-bang cutover, and legacy engineers retrained instead of written off. Notice period: 90 days (negotiable).

SKILLS

Leadership: Managing 3 teams / 24 engineers across two cities, hiring (35+ hires), coaching senior ICs into leads, performance management incl. difficult cases

Delivery: Multi-year migration roadmaps, dependency management across 20+ consumer systems, quarterly business reviews, budget ownership (Rs. 48 crore/yr)

Technical: Event-driven architecture (Kafka), CDC-based coexistence (Debezium/GoldenGate), Java/Spring estates, legacy CBS coexistence patterns (customised Finacle + PL/SQL batch), AWS

Regulated: RBI IT examination responses, change-risk governance, DR-drill accountability, SI/vendor management (AMC and change-request commercials)

EXPERIENCE

Engineering Manager, Ledger & Accounts — Vindhya Bank, Bengaluru

Apr 2020 – present

- Lead three teams (24 engineers, Bengaluru + Chennai) executing the ledger migration off a heavily customised Finacle 7 estate to Java services on AWS.
- Delivered the CDC-based coexistence layer keeping legacy and cloud ledgers reconciled to the paisa daily across 21M accounts — 26 months in production, zero unexplained breaks.
- Migrated 4 of 7 ledger domains to the target stack with zero customer-facing downtime; sequencing survived two RBI IT examinations.
- Retrained 6 legacy CBS engineers into the Java teams (internal program designed with HR); retention of critical legacy knowledge at 100%.
- Manage the system-integrator AMC (Rs. 22 crore/yr) including the capacity step-down schedule.

Team Lead, Payments Backend — Vindhya Bank, Bengaluru

Jan 2018 – Mar 2020

- Led 8 engineers on the UPI and IMPS processing services through the bank's UPI 2.0 go-live; release cycle from monthly to weekly.

Software Engineer → Senior Engineer — Vindhya Bank, Bengaluru

Sep 2010 – Dec 2017

- Core banking batch and online services (Java, PL/SQL, some legacy CBS customisation); on-call for financial-year-end closing runs.

EDUCATION

M.S. Software Systems (WILP) — BITS Pilani (work-integrated), 2012 – 2014

B.E. Computer Science & Engineering — UVCE, Bengaluru, 2005 – 2009
