SUMMARY

Product manager with 8 years on consumer mobile products, the last four owning payments and daily-banking domains at a Bengaluru neobank (800k MAU). I run a real experimentation practice — several of my favorite roadmap ideas are dead because the A/B test said so. Deep UPI and Account Aggregator experience. Notice period: 60 days.

SKILLS

Product: Continuous discovery, JTBD interviews, A/B testing at scale, funnel analytics (Amplitude, CleverTap), OKR-driven roadmaps, stakeholder management incl. compliance/fraud

Domain: UPI (AutoPay, Lite, RuPay credit on UPI), payment requests, Account Aggregator (AA) framework features, video-KYC flows, RBI digital-lending guidelines awareness

Working style: Two-squad PM (iOS/Android/backend), dual-track agile, writes the problem statement first

EXPERIENCE

Senior Product Manager, Payments & Everyday Banking — Kosh Money (neobank), Bengaluru

Sep 2022 – present

- Own the payments domain of an app with 800k MAU across two squads (14 people).
- Shipped payment requests: 34% of P2P volume within a year; the feature now drives 22% of new-user referrals.
- Ran 40+ A/B experiments in 2024-2025; killed a top-3 roadmap feature after painted-door testing showed 0.4% real intent, saving an estimated 2 quarters of build.
- Led the Account Aggregator insights launch: 180k linked external accounts, NPS +6 for users with linked accounts.
- Rebuilt onboarding after funnel analysis: activation (first UPI payment within 7 days) from 46% to 61%.

Product Manager, Growth — Kosh Money (neobank), Bengaluru

May 2021 – Aug 2022

- Owned acquisition and onboarding funnels; built the experimentation cadence the company still uses.

Product Manager — TripKites (travel app), Bengaluru

Jun 2018 – Apr 2021

- PM for a trip-planning app (1.2M downloads); introduced analytics-driven prioritization (Amplitude).

EDUCATION

MBA — IIM Bangalore, 2016 – 2018

B.E. Electronics & Communication — BMS College of Engineering (VTU), Bengaluru, 2010 – 2014
